*Thermoplastic Sheets for Construction, Industry, Advertising and Agriculture*

## SUNGLAZE™ - Environmental Declaration

1. Sunglaze sheets are fully recyclable. Once the sheets complete their service life, they can be sent back to Palram and Palram will reuse 100% of the polycarbonate material to produce new sheets.
2. The production process of Sunglaze sheets includes the usage of up to 30% recycled polycarbonate content.
3. Sunglaze polycarbonate is a durable material produced to last decades in service. This means that the roofing material will not have to be replaced frequently, which in turn means lower environmental impact.
4. Sunglaze conforms with the REACH regulation for avoidance of hazardous materials.
5. Sunglaze complies with the requirements of the European Union's RoHS-3 Directive regarding concentrations of heavy metals, flame retardants and phthalates.
6. For general information please refer to Palram's [Environmental Commitment](#).
